

LEARNFAST

Free 'Role of the Working Memory' eBook

LearnFast is a program which was established in Australia and New Zealand in 2007. Its aims include bringing Fast ForWord and other neuroscience-based programs to students in the home setting and in schools, professional speech pathology and other clinics. The focus of these programs is overcoming learning and reading difficulties and helping children achieve their potential through strengthening memory and executive functioning. The creators of the program are based in Lindfield and Pymble which means local programs are available in the following areas:

For primary and high school children

- [Fast ForWord program](#) - and intensive, evidence-based language and reading intervention that builds the brain's superhighways.
- [Reading Development program](#) - advancing the key cognitive skills required to become a fluent reader.
- [Maths Brain Builder program](#) - strengthening the brain's ability to learn maths.
- [Reading Assistant](#) - an online reading tutor providing intensive reading practice.
- [Cogmed](#) - improving attention by training working memory.
- [The Social Express program](#) - teaching foundational skills for social and emotional learning.

For English language learners

- [Build English Fast program](#) - uniquely targeting the phonemes of English to build the foundational skills required for all literacy.

LearnFast also provide useful and FREE e-resources from time to time.
