CODE IT YOURSELF

After School Coding Clubs for Kids Aged 7-17

CIY CLUB – Term 4, 5 Week Duration

CIY Club sessions allow kids to follow their passion and learn many exciting areas of technology, focusing on the foundations of coding, website and app development, 3D printing, electronics and robotics. Catering to school aged children of all experience levels, young coders work their way through their desired pathway, gaining vital skills and completing achievements from level 1-9. There is no time limit to level-up and every coder will proceed at their own pace. Just like karate it takes patience and dedication to become a master!
