

Community Asthma Program

PHYSICIAN ASSISTANT

Have you been told your child has asthma?

Has your child been given Ventolin by your doctor?

Did Ventolin help your child's breathing?

How we can help

- The Community Asthma Program (CAP) provides **free** asthma education and support for children (1-18yrs) and their families
- Education is provided in an easy to understand way
- It can be in your home, the community health service or a place that works for you and your child.
- We are a trained team of asthma nurse educators based in the community and want to help you manage your child's asthma; mild or severe.

**Just call us on
