

THE SOCIAL ART

TRANSFORMING INDIVIDUAL AND SOCIAL FIELDS

- How do intentional groups, communities and organisations truly become more than the sum of their parts?
- How can we think and act so that we are working “in the zone” or “in the flow” more of the time?
- What are the cosmic forces working on our human potential?
- How can we realise our dreams as individuals and as groups?

Understanding the process of creation and the human qualities required to create — whether it is bringing an idea to fruition or achieving a common goal—are at the core of answering these questions and overcoming the obstacles to fulfilling our individual and collective missions.

In each 2 ½ hour workshop, we explore through sound and movement the 12 qualities of individuals and groups toward creative action. We'll look at the influence and relevance of the old and new astrology on the human being. We become conscious of our individual field and the social field around us so that we can work more sensitively, harmoniously and effectively with others.
