➤ **Important Changes to the Bachelor of Health Science for 2018**

Monash Medicine, Nursing and Health Sciences has introduced some changes to the Bachelor of Health Science, taking effect in 2018. Instead of choosing a specialisation, students now enrol straight into the degree of their choice.

Bachelor of Health Sciences

Students build a sound foundation in health care and learn to identify, investigate, analyse and assess health issues. They will have the flexibility to explore different areas of health and customise their degree to suit their interests.

Bachelor of Public Health

This course gives students the opportunity to pursue their passion for promoting good health, preventing disease, and managing illnesses. They will be taught by passionate teachers with a global orientation, getting them ready to make a difference and address real health challenges for communities and populations.

Bachelor of Radiation Sciences

This course is ideal for students interested in becoming a radiation therapist. Throughout the program students will be immersed in the latest technology, participate in 3D treatment simulations and complete clinical placements from second year. Taught by experienced radiation therapists, students are kept up-to-date with the latest industry developments. The Bachelor of Radiation Sciences is a great pathway into the Master of Radiation Therapy at Monash.

Bachelor of Paramedicine

This course prepares students to be ready to save lives and qualify as a paramedic. Students gain hands-on paramedic experience with placements from Semester 1, while working in clinical and community settings and learning from experienced paramedic educators. Graduates work with emergency health services across Australia and overseas.

Nutritionists and Dietitians

According to the Dietitian Association of Australia (DAA) - [Dietitian Association of Australia \(DAA\)](#), there is a distinction made between dietitians and other occupations in the nutrition and food science field, including that of nutritionist. The key difference between a dietitian and a nutritionist is that, in addition to or as part of their qualification in human nutrition, a dietitian has undertaken a course of study that included substantial theory and supervised and assessed professional practice in clinical nutrition, medical nutrition therapy and food service management. **So, in Australia, all dietitians are nutritionists however nutritionists without a dietetics qualification cannot take on the expert role of a dietitian.**

Victorian universities offering undergraduate courses in nutrition, food science and/or dietetics include:

Welcome to the School of Education

Schools are places of change and development for children and young people. Christian teachers make significant impact on the lives of their students showing them something of the love and power of God, as well as helping them understand themselves, develop knowledge and skills and the capacities to live abundant and fruitful lives.

Bachelor of Education – Primary or Secondary

This will qualify graduates to apply for registration as teachers in Australia and overseas, and allow them to teach in government, Christian and independent schools.

You will study in a supportive and intimate environment, learning not only the skills necessary to teach but also engaging with ideas of faith and Spirit. A core of theological units will challenge, broaden and connect you with your educational vocation.

Commonwealth supported places and HECS-HELP available for the Bachelor of Education.

The Bachelors of Education are integrated with each other, and the College's Bachelor of Arts. Students can transfer easily from one course to the other in the first two years of study. This provides great flexibility as we recognise that students' early goals can modify as their studies progress.

Applications are made directly to Eastern College Australia and NOT through Victoria Tertiary Admissions Centre (VTAC).

2018 The University of Melbourne

EXTENSION PROGRAM INFORMATION EVENING

The Extension Program offers an academic challenge and a taste of university life, as well as the opportunity to gain an ATAR increment and credit towards a subsequent undergraduate degree.

High achieving students have the opportunity to undertake first-year university study during Year 12.

Subjects offered through the Extension Program build on VCE studies and extend study to first-year university level.

Extension Program applicants can study one of 30 different humanities, language, mathematics, science and commerce subjects.

There are no University of Melbourne tuition fees for Extension Program students in 2018.

Students interested in the program should attend an information evening to find out more about what is involved, ask questions and meet staff who will be delivering the program.

Applications for the program will open late **August**.

When: **Wednesday 13 September 2017**

Time: **6.30pm—8.00pm**

Where: **Melbourne School of Design**, Singapore Theatre
