

Cyber Safety Parenting

Raising Children researchers have identified three main kinds of internet risks for teenagers:

1. Content risks
2. Contact risks
3. Conduct risks

Internet safety risks for teenagers

1. Content risks

For our children, these risks include coming across material that they might find upsetting, disgusting or otherwise uncomfortable, especially if they encounter it accidentally.

This material might include:

- pornography
- real or simulated violence
- hate sites
- harmful user-generated content i.e. sites about drug use, self-harm, suicide or negative body image.

2. Contact risks

These risks include coming into contact with adults posing as children online or with strangers who persuade teenagers to meet them in real life, or being the victim of an online scam.

3. Conduct risks

These include behaving in inappropriate or hurtful ways, or being the victim of this kind of behaviour.

Examples include:

- cyberbullying
- sexting
- misusing people's passwords and impersonating people
- making unauthorised purchases
- creating content that reveals information about other people.

Another conduct risk for teenagers is having trouble regulating online time, which can develop into internet addiction disorder.

cyber[smart:]

TMI Aussie teens and sexting

Teens + technology

What follows won't be a surprise ...

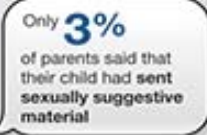

nOodz are out there

Aussie teens—girls and boys—are sending and receiving sexually suggestive nude or nearly nude pics and videos*

... but it's not MY child

Parents are in the dark about how much their teens and friends are exposed to sexting*

Destination unknown

Once it's out there, there's no knowing where it will end up

88% of self-generated images had been collected and put on other sites**

Let's talk about sex(ting)

Talk to your kids about the legal and personal consequences

So it's happened ... how you can help

Delete Stay calm and delete: Help your child ask the people who received it to delete it. Untag it.

Report Report it: Contact the website, the ISP, the school—whoever can help get it taken down.

Support your child: Talk about it with your teen ... they need you now. If you can't deal with it on your own, get professional help for them. Remember, it's not the end of the world!

Sexting

The nude and suggestive pics aren't okay. Sometimes our children end up posting pictures on social media sites that can have an unintended future. Sending nude or sexual photos of themselves or others under 18 years of age could be classed as possessing and distributing child pornography.

Have a look at these websites:

Some ideas to manage safe cyber space in your family include:

Parental controls

You can limit access to adult content, select times when the phone can be used, block unwanted calls, and manage costs. Some parental controls for computers, tablets, and smartphones are listed at esafety.gov.au/education-resources/iparent/online-safeguards/parental-controls/computers-tablets-and-smartphones

Search safely

Safe browsers such as Spin are one way to ensure online safety.

Balancing time online

The thinkUknow website has a family media contract template.

Filtering software

Browser-independent filtering requires filtering secure (HTTPS) traffic to prevent proxy workarounds by sneaky teens.

7 WAYS

parents can manage web connected devices in the home

ALMOST
1 in 3

teens are accessing the internet between 10pm and midnight

[Aussie teens & kids online >](#)

1

39 %
of teens use a tablet to go online

[Parental controls for tablets >](#)

Parental control tools are available for Apple's iOS & Android.

Playstation, Xbox, Wii and Steam have parental controls.

2

47%

of teens play games online

[Games & parental controls >](#)

3

64% of teens stream video on YouTube & TV

[Streaming services settings >](#)

YouTube and YouTube Kids have a **safety mode**; YouTube Red offers ad-free videos. Netflix and Stan offer **age-based settings**.

Microsoft Windows and Apple's MAC OSX offer **family restrictions and monitoring**.

4

74%

of teens use a computer to go online

[Use safety settings >](#)

5

78% of teens research and browse on the internet

[Tips on searching safely >](#)

Safe search settings are available for Google Safe Search, Google Chrome and Yahoo7.

Telstra Mobile Protect, Vodafone Guardian, Apple iOS and Android have **safety options**.

6

80% use a smart phone

[Smart phone parental controls >](#)

Parental controls can keep kids safe on many screens

Telstra provides **parental control tools** and homework time blackouts; Optus and Vodafone provide guidance on tools.

7

86 %

have home broadband access

[See parental controls >](#)

THEY CAN

- ✓ Block sexually explicit sites
- ✓ Set screen time limits
- ✓ Block in-app purchases
- ✓ Block numbers and SMS
- ✓ Allow or block websites
- ✓ Restrict chat features
- ✓ Allow parental monitoring

REMEMBER

No parental control is 100% fail safe. Keep children's trust by using these tools openly at home
