Handwriting skills

How is your son's handwriting? Does your son's handwriting affect his ability to get his ideas down on paper in a coherent and legible way? Would improvements to the speed and style of his handwriting help him perform to his potential on tests, exams, assignments and assessments? Does he experience pain when writing?

Designed and run by an experienced occupational therapist, this program has been developed to bring creativity and good mechanical and organisational skills to the practice and improvement of handwriting.

The Program will include activities to:

- **Promote imagination and foster a desire to write**
- **Develop upper limb muscle control, eye hand coordination and finger strength and dexterity.**
- **Identify the right tools and spaces so writing feels comfortable and is optimised**
- **Focus on good writing ergonomics, techniques and planning**
- **General assessment of writing to see what's working and what's not**

The program will be run on a small group basis so that professional guidance, peer feedback and modelling can be maximised.

It is open to all students in the school from Years 5 to 10

The program will run over 8 consecutive weeks from Week 2 of Term 2 2017 to Week 9.

Time: 3.20pm – 4.30pm each school day afternoon

Location: St Pius X College, Room - LC2

Cost: \$280.00 per student

You may be able to claim on your Private Health Insurance cover for this program if your policy includes OT under extras cover – item Number 300 Group therapy intervention.
