

Green Team: Dear Miss Hotchin,
The role of the green team is to encourage others to be more of an ^{environmentally} environmentally friendly person and help the planet. It also encourages a cleaner, greener school for the students and teachers. This role will have a lot of great outcomes such as not as much rubbish will go into landfill and most importantly not produce bad gasses into the atmosphere.

I believe for the sake ^{of the} environment and BRPS our school grounds should be clean, environmentally friendly, and a better place overall. I can help do this by composting, not waste food everyday, recycling, cleaning up rubbish (even when it isn't mine), not waste food or paper, and many more things.

This role will also help me by get into a habit of becoming a more environmentally friendly person than I currently am.

If we all tribute it's true "We can make a difference!"

From Tahlee.

Green Team

Anna K

Reuse, Reduse, Recycle.

That what I do and that's what will make me a great green team member.

I want to help our world soooooo bad. I will give up all the lunch times I need to for the green team to help this world.

Reuse,

At home (and school) I reuse everything I can. I've reused a lunch box since I was five because it's perfectly good condition.

Redused,

I have Redused the amount of plastic we use by collecting it and bringing it to Coles to get recycled. We are also planning to by a worm farm to reduce our food scraps.

Recycle,

We recycle everything we can throw into the recycling bin. We also bring old furniture to opshops and give old cloths we've grown out of to younger family or friends.

We also do other things like turn out the light before we leave and only use air con or heater when we have to. That's when I would be a great green team member. flin~

Green Team

Lily O'Connell

Dear Ms Hutchinson and Ms Nolan

Last year I had a lot of fun being the green team monitor and this year I would like to have the opportunity to be in the green team again. It was a definite highlight of my year. Saving our ocean, animals and saving our environment was the main thing I tried to focus on. 1 or 2 years ago we were successful at getting 1 Star and this year I would like to get 2.

If I become green team monitor, some of the things that I would do to help the school get 2 stars are pick up rubbish off the ground that people drop, continue to compost our fruits and vegetables, try to get the whole school to make the bees wax wraps and put more plants in our school.

Some of the qualities that you need to have to be the green team monitor are commitment, passion and positivity. So if I become a green team monitor I can show all of those qualities. I think that these 3 amazing qualities are very important and here's why:

1. Commitment

Being committed to what you do is very important. Say you were the boss of your job, you would have to be at your job every day unless it is an emergency. If you don't show up that shows that you aren't committed. But if I'm the green team monitor I will show up every day unless it's an emergency

2. Passion

Having passion is an important quality to have because if someone just said a speech just to be noticed that wouldn't show any passion to me. When you are passionate about something you would say it with expression and positivity. So if I'm the green team monitor I would show lots of passion because I hate seeing sea life die.

3. Positivity

Being positive 24/7 is mostly what I am and I try to be. You wouldn't want to be sad all the time and I wouldn't think anyone would. Positivity is a terrific quality to have because you can always have a laugh and I love laughing. So if I'm in the green team I would make everyone happy and stay happy.

So in conclusion If I became green team monitor once and for all I would show all 3 qualities and try to get that 2nd star!

From Lily O'Connell
